Node.js Project 2: Small Project on Templates

Rehearsing the skills on

- Utilize EJS or JADE template engine with Express.js
- Parse JSON files using EJS templates
- AJAX

TASK:

1. Create an app which will send search query and fetch JSON data from an API of your choice. Use these lists for a reference: AnyAPI or Public-APIS.io.	4
2. If AJAX creates problems, you can read the data from a local file.	2
3. Apply EJS/Jade templates to display the data.	2
4. Utilize partials for each page.	2
5. Use Pure.css or Bootstrap to style the pages	2
6. Deploy to Heroku. Return code to GitHub.	2
